Decision Tree for Identifying COVID-19 Close Contacts in K-12 School INDOOR CLASSROOM Settings

Note: Complete this decision tree for students and adults in an indoor classroom setting who were within 6 feet of the infected person starting 2 days prior to symptom onset or positive test. If the infected person is not showing symptoms, use the date the test was collected.

Was the exposure to a person with COVID-19 in an indoor classroom setting?

Yes

Are the infected person and the potential close contact both students?

Yes

Were the infected student and potential close contact both wearing masks consistently and correctly?

Yes

Was the potential close contact less than 3 feet from the infected student for a cumulative total of 15 minutes or more over a 24-hour period?

Yes

The person is a close contact.

No

Was the potential close contact less than 6 feet from the infected student for a cumulative total of 15 minutes or more over a 24-hour period?

Yes

The person is not a close contact.

No

No

The person is a close contact.

No

Use the decision tree for K-12 school non-classroom settings
