

## Close Contacts

Someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period (for example, three individual 5-minute exposures for a total of 15 minutes).

*Exception: In the K–12 indoor classroom setting, the close contact definition excludes students who were within 3 to 6 feet of an infected student (laboratory-confirmed or a clinically compatible illness) if both the infected student and the exposed student(s) correctly and consistently wore well-fitting masks the entire time. (This exception does not apply to teachers, staff, or other adults in the indoor classroom setting.)*

Except in K–12 indoor classroom settings as described above, mask use is not considered when defining a close contact during case investigation and contact tracing, regardless of whether the positive person or the person exposed was wearing a mask.
